Weekly Meeting 75 is happening on Wednesday September 28, 2022 from 9:00 AM PST(16:00 UTC) - 10:00 AM PST (17:00 UTC)

You can add it to your calendar [here](#).

We'll be meeting again in the omi-weekly-meeting channel of the [AngellXR/OMI Discord](#).

We regularly use the # omi-meeting-chat channel for text chat.

Who we are and why we're here:

The Open Metaverse Interoperability Group (OMI) is focused on bridging virtual worlds by designing and promoting protocols for identity, social graphs, inventory, and more. Our members include businesses and individuals working towards this common goal.

If you're an observer or here for the first time, this is a meeting where people who work on the OMI group initiatives discuss updates and contribution opportunities for current projects and goals. This is your chance to jump in and help!

We welcome you to introduce yourself in #omi-meeting-chat as we dive into the agenda items. There will be an open floor in the last 15 minutes of the meeting (agenda permitting) where we can discuss any items you feel are relevant to the current or near future OMI goals.

- weak turnout for dev hour this week. May want to consider reducing the frequency or canceling for now.

M3 HQ tour

Started with a quick tour of M3's new HQ

Can use tools like ungltf and vrm to simplify import/export workflows

Metafactory will go here on the 2nd floor:

Proposed concept of adding an OMI space next door. Related to [#218](#)

Evo to add design resources to [omigroup/omigroup/assets](https://github.com/omigroup/omigroup/assets)

Would be nice to be able to change in one place and have it reflect in all platforms that it is in.

Media

- seeking short interview clips
- seeking editing for some of the clips
- some new events coming up, thinking through where this content may fit into our broader media landscape.
- meeting in 2 weeks to actively go through and curate on that front. October 11th, 2022 at 16:00 UTC

If you are interested in the media and educational storytelling side of our work, we hope you will get involved!

- Launched Webaverse MMO for improving docs / readmes: <https://github.com/webaverse-mmo>
 - Why: Webaverse solves a lot of hard challenges and is great for case studies but needs better documentation
